

on-demand

hundreds of apps  
one platform

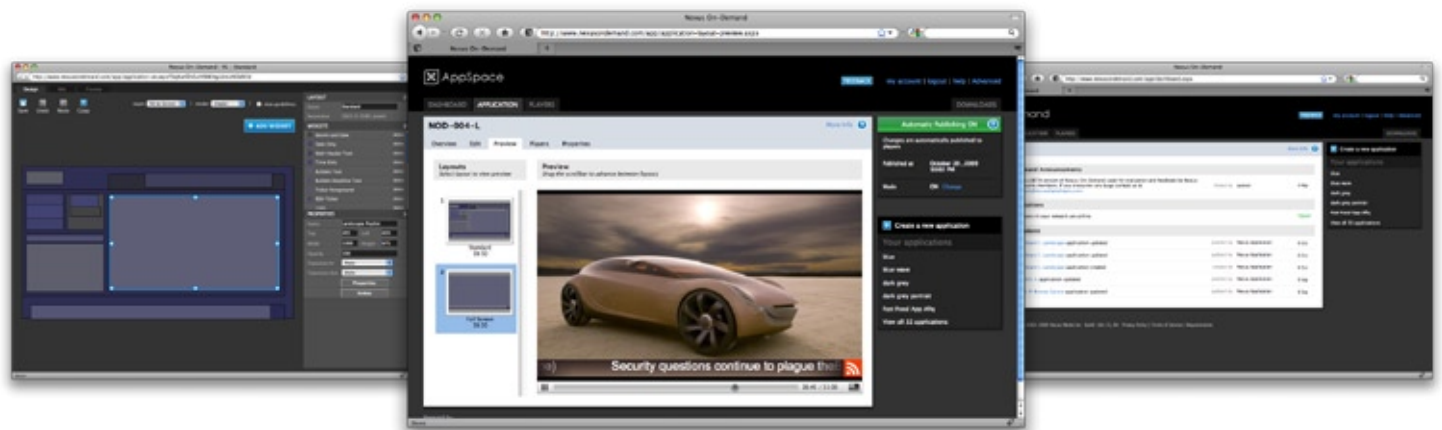

# Manage your Apps in the Cloud

Digital signs, smart phones, kiosks, video walls, directories and more

Manage all your applications and content on a robust online platform with access to features and functions that empower flexibility and creativity.

## Create

Create engaging apps for passive and interactive digital signs, kiosks, video walls and more. Our visual editor tool lets you create apps with templates or from a blank canvas.

## Schedule

Scheduling lets you control the date and time your content or layout will play. Schedule for playback at different times throughout the day, week, month or year.

## Manage

Organize and manage your content using our online content library. Images, videos, audio, data sources and much more are supported with meta tagging options.

## Reports

View reports to see how people engage with your on-screen content. AppSpace provides reporting tools that allow you to review playback impressions, interactive access and more.

## Publish

Decide when the latest application changes should be published for the world to see. Updates can be published manually after a review session or automatically as changes happen.

## Alerts

Monitor all of your player devices through a central online dashboard with live alerts and email notifications. Integrated troubleshooting tools provide guidance and support to resolve potential issues.

# Platform Delivery

AppSpace is flexible and constantly up-to-date with new features and functions. Choose the application management platform that is right for your business.

## CLOUD

Subscribe to the Cloud service

- **Free 30 day trial**
- No server hardware or software
- Annual or monthly subscription

## PRIVATE CLOUD

Run AppSpace on-premise on a server in your network

- Increased speed
- Alignment with existing IT policies
- One-time purchase

## HYBRID

Integrate Cloud services with existing infrastructure

- Custom deployments
- Connect hybrid networks
- Flexible subscription or purchase

# Professional Services

Work with our professional services team to bridge the gap between teams that create the content and teams that manage the technology.

## Consulting

- Brainstorm and architect relevant user experiences
- Plan project requirements specifications, and overall budget

## Creative

- Full-service creative design agency with digital signage screen expertise
- Application and content design and conceptualization

## App Programming

- Open API architecture enables extensibility and customization
- Integrate with external databases, devices and much more

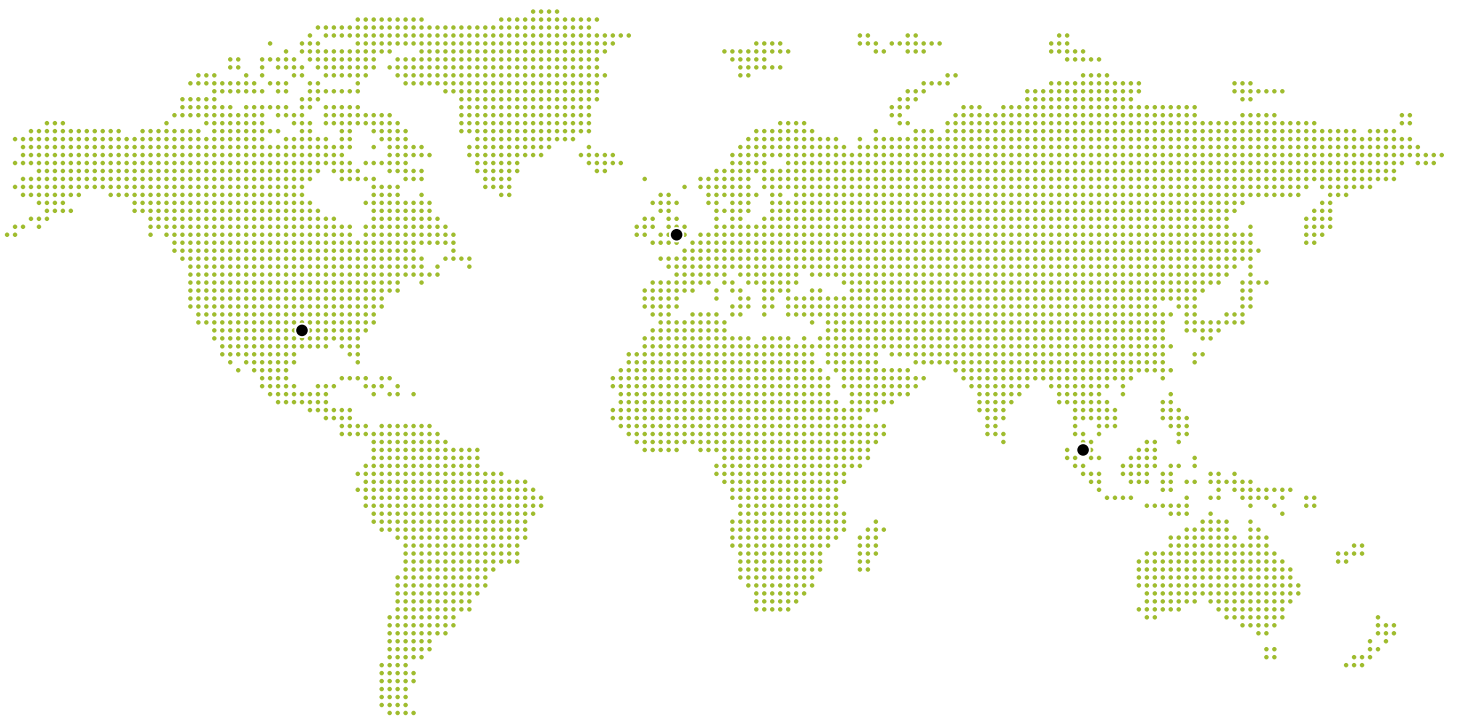

## Project Management

- Project planning, resource management and project execution
- Project timeline management
