Overview

The Nexus Video Wall™ lets you break the visual barriers of a single screen and go beyond. Display your content across multiple screens in any format and configuration using just a single player device. The visual technology powering the Nexus Video Wall supports a total canvas resolution that is much greater than Full 1080 HD — entering a new world of ultra definition resolutions.

How it works

Connected to the Nexus Communication Server™ platform, any digital media application created using the Nexus Visual Editor™ and other custom applications can be readily displayed on the Nexus Video Wall in any preferred screen configuration. Whether you are managing a single video wall or multiple video walls, we provide all the essential tools to help you manage everything centrally.

Features & Benefits

- Add visual presence and enhance the aesthetics of any property with large and seamless video wall displays
- Create large digital billboards, specialty retail displays, large transit timetables, public information displays and more
- Display content seamlessly across different screen configurations using just a single player device at resolutions much higher than Full 1080 HD
- Flexible content management platform allows you to display any digital media application and centrally manage all content and layouts
- Schedule media zones with a wide variety of content types including images, video and animation — layer them together and discover unlimited creative possibilities

Standard Components

- **Templates:** Choose from a variety of templates to match your design preference and purpose
- **RSS:** Display RSS feeds as scrolling text messages or informational slides
- **Clock:** Show the date and time with customizable formatting options
- **Event Calendar:** Show scheduled events from a calendar with options to view by day, week or month
- **Emergency Messaging:** Broadcast global emergency alerts and announcements

Screens and resolutions

The Nexus Video wall is able to drive ultra definition content seamlessly. When it comes to the size, number and orientation of screens, the Nexus Video Wall can work with many different screen configurations.
